Steps:

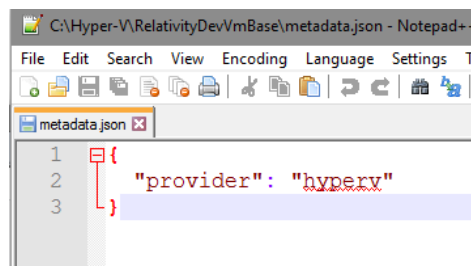

1. Copy metadata.json file to the folder where Base VM files exist.

vs (C:) > Hyper-V > RelativityDevVmBase

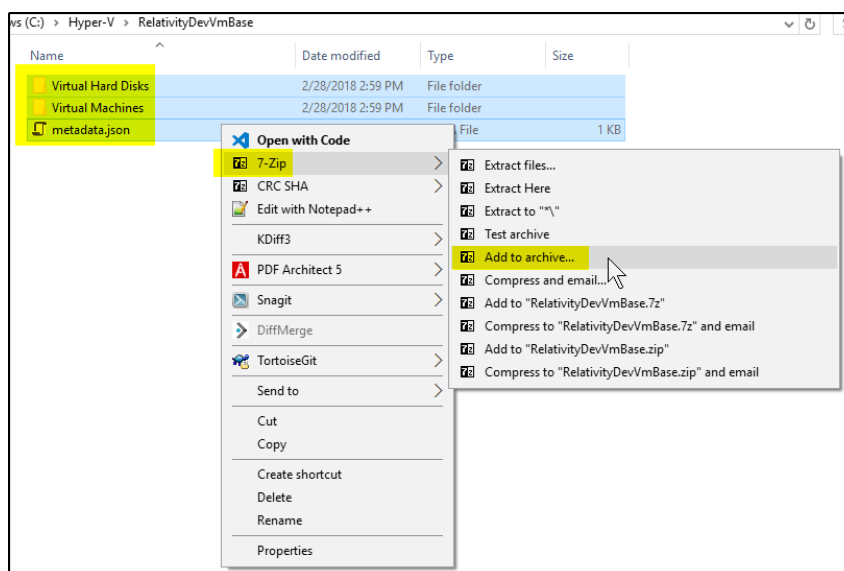

Name	Date modified	Type	Size
Virtual Machines	2/28/2018 12:30 PM	File folder	
metadata.json	1/17/2018 4:22 PM	JSON File	1 KB

Contents of metadata.json:

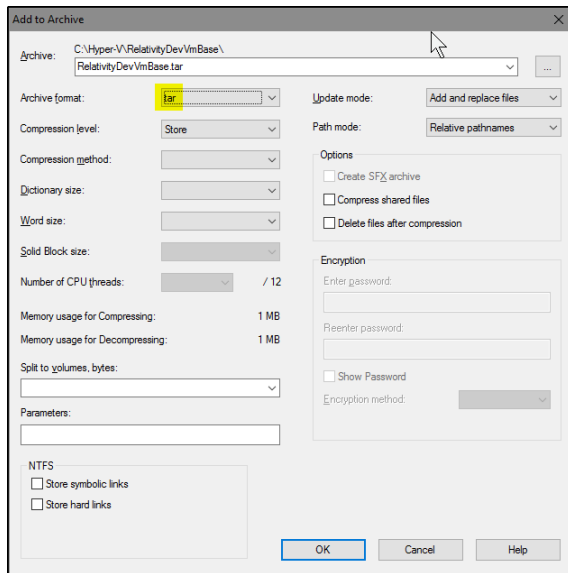

```
{  
  "provider": "hyperv"  
}
```

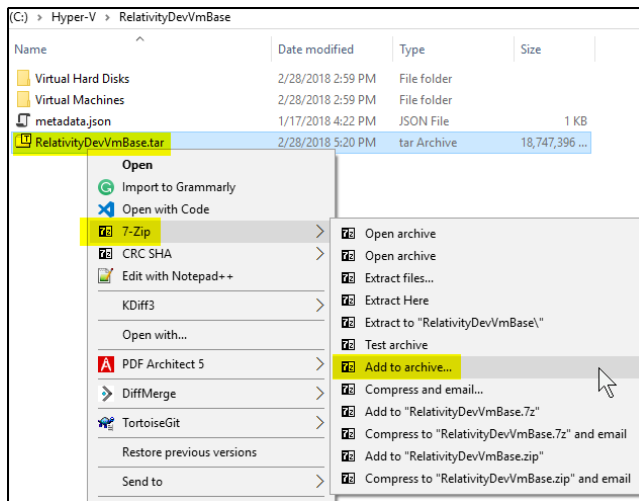

2. Select all the files in this folder, right-click and do 'Add to archive' 7-zip option

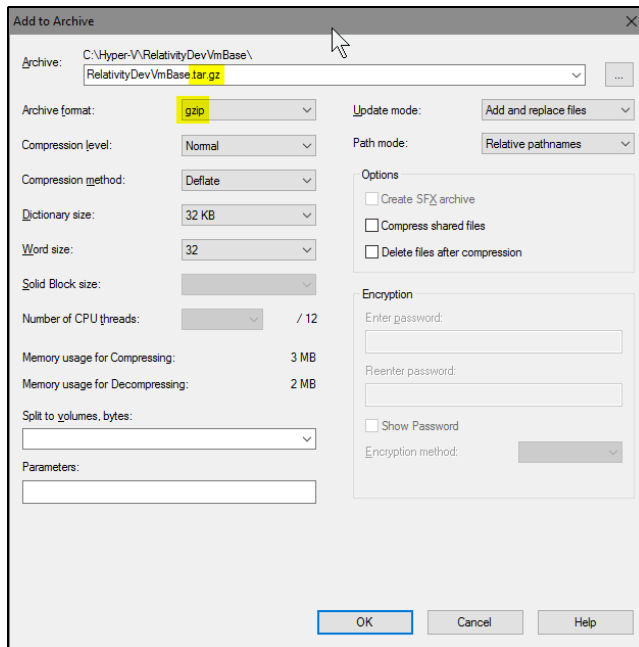

3. Tar zip the contents

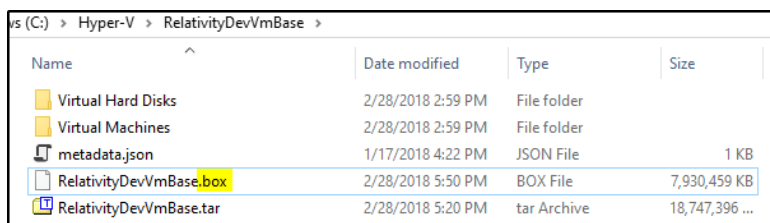

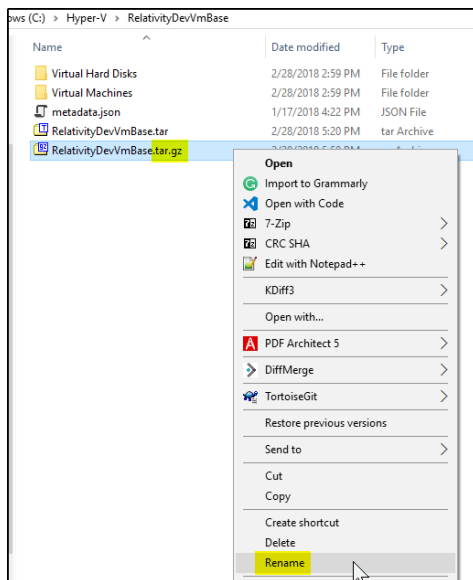

4. Gzip RelativityDevVmBase.tar

5. Rename .tar.gz extension to .box

6.
